

Set of Bomb Jammers «Model - 30PS»

Set of Bomb Jammers “30PS” is intended to block operation of radio controlled fuses based upon cellular phones of GSM 900/1800 standards operating within 935...960 and 1,805...1,880 MHz frequency band.

The system is delivered in two standard Samsonite® attaché-cases (unit 1 and 2). «30PS» has no extractable emitting antennae and other de camouflaging features.

The device offered can be used in a stationary option when powered from the standard mains 220-240V/50-60 Hz or in portable option when powered from built-in rechargeable battery. The set of accessories includes also two AC/DC power supplies and two AC/DC chargers (one for each case)

The device offered is simple in exploitation and maintenance, does not require any adjustment routines.

Technical specifications:

- | | |
|---|--|
| • unit 1 frequency band, MHz | 935...960 |
| • unit 2 frequency band, MHz | 1,805...1,880 |
| • the radius of guaranteed envelope of cellular phone neutralisation when jammer is located at a distance not less than 400 m from the base station, not less than, m | 100 |
| • power requirements | 220-240V/50-60 Hz or built-in rechargeable battery |
| • unceasing operational time from powered from AC mains 220–240V/50–60Hz, hours, not less than | 8.0 |
| • continuous operational time from the autonomous power source, not less than, minutes | 90 |
| • dimensions, mm, one unit | 460 x 400 x 140 |
| • mass, kg, one unit | 12.5 |
