

Bomb Jammer «Model - 4T» (Vehicle Mounted)

The vehicle mounted Bomb Jammer «4T» protects VIP preventing acts of terrorism when explosive devices with radio controlled fuses may be used.

Device's action is based upon emitting special signals within radio frequency bands used for operation of home-made and industrial manufactured radio controlled fuses. Bomb Jammer «4T» ensures a reliable blocking of radio controlled fuse operation in 20...500 MHz frequency band.

The main unit is placed in a vehicle boot (saloon). The device is powered from vehicle power line. It can be switched on and off from the

passenger compartment using a special wire remote controller. Four antennae are placed on the car roof using special detachable fixing elements (mounts).

The device offered is simple in exploitation and maintenance, does not require any adjustment routines.

Technical specifications:

- Radius of radio controlled fuses blocking zone (at control distance not less than 100 m), not less than, m 40
- Mass of the set, not more than, kg 15
- Execution splash-proof
- Dimensions, mm
main unit (without fixing elements) 528 x 305 x 138

Russian patents protect design and circuit of Bomb Jammer "4T". Also it has Hygienic Certificate of State Sanitary Inspection Committee and certificate of State Standard Committee of Russian Federation.
